# PARKINOVA

Medical Assessment Report

## A. Patient & Report Information

| | |
|---|---|
| **Patient Reference** | API-TEST-PT |
| **Age / Gender** | Not specified / Not specified |
| **Assessment Date** | 2026-10-27 12:00:00 |
| **Report Reference ID** | API-TEST-001 |
| **Completed Modules** | Brain MRI Scan, Archimedean Spiral Analysis |
| **Lead Evaluator** | Dr. Researcher |

## B. Combined Assessment Summary

| | Model Prediction | Confidence |
|---|---|---|
| | No Parkinson's-related pattern detecte | Not provide |
| aitin | Standby — Integration Interface Ready | Standby (No |

### Multi-Modal Synthesis: MRI Evaluated · Spiral Verified

Brain MRI deep learning inference was successfully completed. The uploaded Archimedean spiral sketch was verified for geometry and stroke contrast and remains on integration standby. No synthetic combined risk score is calculated to protect diagnostic integrity.

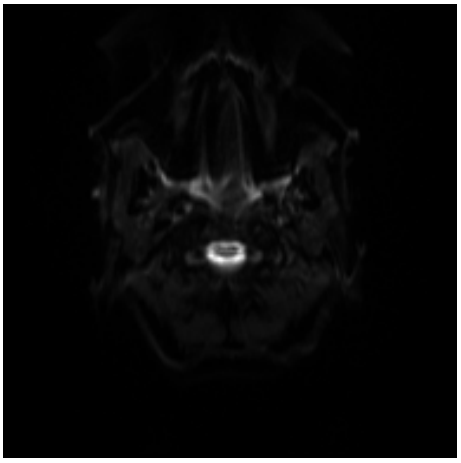
## C. Brain MRI Neuroimaging Analysis

| | |
|---|---|
| **Analysis Status** | Completed |
| **Model Prediction** | No Parkinson's-related pattern detected |
| **Confidence / Score** | Not provided by model |
| **Model Architecture** | Parkinson CNN (244×244×3) |
| **Input Preprocessing** | 244×244 Lanczos Resizing, Channel Standardization |
| **Image Source** | sample_normal_1.png |

### Model Findings & Interpretation:

Test explanation

### Evaluated Brain MRI Scan:



## D. Spiral Drawing Analysis

| | |
|---|---|
| **Analysis Status** | Model Standby (Awaiting Trained Spiral Model File) |
| **Model Prediction** | Standby — Integration Interface Ready |
| **Confidence / Score** | Standby (No score calculated) |
| **Model Architecture** | Archimedean Spiral CNN (244×244×3) |
| **Image Resolution** | 400 × 400 pixels |
| **Stroke Coverage** | Analyzed |
| **Drawing Source** | None |

### Visual & Kinematic Observations:

• **Image Geometry:** 400 × 400 pixels

---

### Regulatory Notice & Academic Disclaimer

*This application is an academic AI research prototype. Its output is generated by a machine-learning model and is not a medical diagnosis. The model's performance and reliability may vary depending on image quality, dataset characteristics, and the images used during training. Consult a qualified neurologist for medical evaluation.*
