PARKINOVA

Medical Assessment Report

A. Patient & Assessment Information

Patient Reference	TEST-PT-COMBINED
Age / Gender	68 / Female
Assessment Date	2026-10-31 14:23:32
Report Reference ID	TEST-COMBINED-001
Completed Modules	Brain MRI Scan, Archimedean Spiral Analysis, Symptom Questionnaire
Lead Evaluator	Dr. Researcher

B. Combined Assessment Summary

Analysis Component	Completion Status	Model Prediction
Brain MRI Scan	Completed	Parkinson's-related pattern detected
Spiral Drawing	Model Standby (Awaiting Trained Spiral Model File)	Standby — Integration Interface Ready

Multi-Modal Synthesis: MRI Evaluated · Spiral Verified

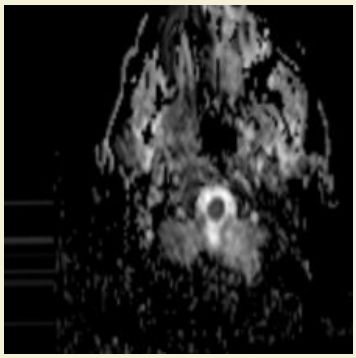
Brain MRI deep learning inference was successfully completed. The uploaded Archimedean spiral sketch was verified for geometry and stroke contrast and remains on integration standby. No synthetic combined risk score is calculated to protect diagnostic integrity.

C. Patient Symptom & Cognitive Assessment Profile

Symptom Domain	Category	Patient Response
Tremor	*General*	Often
Memory	*General*	Sometimes

Note: 2 of 13 self-reported questions completed on 2026-10-31 14:23:32. Symptom frequencies are self-reported for research and risk documentation purposes only; they do not independently constitute a diagnostic evaluation.

D. Brain MRI Scan Analysis

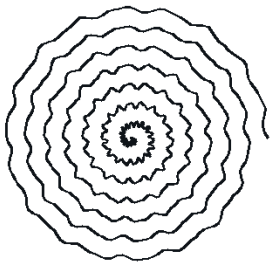


Analysis Status	Completed
Model Prediction	Parkinson's-related pattern detected
Model Architecture	Parkinson CNN (244x244x3)
Input Preprocessing	244x244 Lanczos Resizing, Channel Standardization
Image Source	sample_pd_1.jpg

Model Findings & Interpretation:

Structural intensity variations observed in axial slices.

E. Archimedean Spiral Drawing Analysis



Analysis Status	Model Standby (Awaiting Trained Spiral Model File)
Model Prediction	Standby — Integration Interface Ready
Model Architecture	Archimedean Spiral YOLO / CNN (244x244x3)
Geometry & Stroke	400 x 400 pixels | 6.2% canvas coverage
Drawing Source	sample_spiral_patient.png

Visual & Kinematic Observations:

- **Image Geometry:** 400 x 400 pixels
- **Aspect Ratio:** 1.0:1
- **Stroke Coverage:** 6.2% canvas coverage

Regulatory Notice & Academic Disclaimer

This application is an academic AI research prototype. Its output is generated by a machine-learning model and is not a medical diagnosis. The model's performance and reliability may vary depending on image quality, dataset characteristics, and the images used during training. Consult a qualified neurologist for medical evaluation.
