PARKINOVA

Medical Assessment Report

A. Patient & Report Information

Patient Reference	PT-2026-084
Age / Gender	68 / Male
Assessment Date	2026-10-31 13:40:00
Report Reference ID	test-uuid-12345
Completed Modules	Brain MRI Scan, Archimedean Spiral Analysis
Lead Evaluator	Dr. Researcher

B. Combined Assessment Summary

	Model Prediction	Confidence
	Parkinson's-related pattern detected	Not provided
Predi	Spiral drawing shows motor irregularit	Raw Score:

Multi-Modal Synthesis: Divergent Findings (Disagreement Across Modalities)

The MRI scan analysis and spiral drawing analysis yielded divergent results. In neurology, structural imaging and motor performance frequently diverge: early structural changes can occur prior to tremor, or physiological tremor may affect drawing sketches while 3T MRI is unremarkable. Both results are presented transparently; direct clinical evaluation by a licensed neurologist is essential.

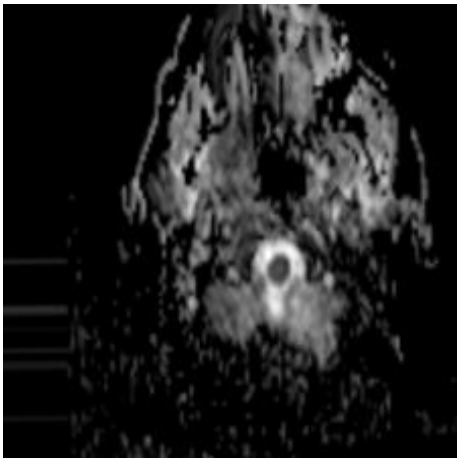
C. Brain MRI Neuroimaging Analysis

Analysis Status	Completed
Model Prediction	Parkinson's-related pattern detected
Confidence / Score	Not provided by model
Model Architecture	Parkinson CNN (244×244×3)
Input Preprocessing	244×244 Lanczos Resizing, Channel Standardization
Image Source	sample_pd_1.jpg

Model Findings & Interpretation:

The convolutional network identified structural variations in the deep grey nuclei characteristic of Parkinsonian neuroimaging patterns.

Evaluated Brain MRI Scan:



D. Spiral Drawing Analysis

Analysis Status	Completed (Model Prediction)
Model Prediction	Spiral drawing shows motor irregularities correlated with Parkinsonian tremor patterns
Confidence / Score	Raw Score: 0.985
Model Architecture	Archimedean Spiral CNN (244×244×3)
Image Resolution	256 × 256 pixels
Stroke Coverage	6.2% canvas coverage
Drawing Source	sample_spiral_patient.png

Visual & Kinematic Observations:

- **Image Geometry:** 256 × 256 pixels
- **Stroke Coverage:** 6.2% canvas coverage
- **Stroke Contrast:** 235.0 greyscale range

Uploaded Spiral Drawing:
